

Lesion Post Procedure Instructions

- You may remove your outer dressing this evening or tomorrow.
- It is okay to wash your hair, face and body with your regular soap. It is okay to get your incision wet. Just pat dry afterwards.
- **If you have dissolvable stitches:** leave your steri-strips in place until they fall off.
- **If you have stitches that need to be removed:** for the first 2 days following your procedure, apply antibiotic ointment, Vaseline or Aquaphor to your incision twice a day.
- It is okay to take over the counter pain reliever if necessary.
- For any questions or concerns, call our office at 601-987-6581.
